Job Description

Bioinformatics Analyst - Medical Oncology and Hematology - Toronto, Ontario

[Back to Search Results](#)

[Job Posting #914878](#)

Position: [Bioinformatics Analyst](#)

Site: [Princess Margaret Cancer Centre](#)

Department: [Medical Oncology and Hematology](#)

Reports to: [Principal Investigator](#)

Hours: [37.5 per week](#)

Status: [Permanent Full-time](#)

[University Health Network \(UHN\)](#) is looking for an experienced professional to fill the key role of [Bioinformatics Analyst](#) in the [Medical Oncology and Hematology Division](#).

Transforming lives and communities through excellence in care, discovery and learning.

The University Health Network, where “above all else the needs of patients come first”, encompasses [Princess Margaret Cancer Centre](#), [Toronto General Hospital](#), [Toronto Western Hospital](#), [Toronto Rehabilitation Institute](#), and the [Michener Institute of Education at UHN](#). The breadth of research, the complexity of the cases treated, and the magnitude of its educational enterprise has made UHN a national and international resource for patient care, research and education. With a long tradition of groundbreaking firsts and a purpose of “*Transforming lives and communities through excellence in care, discovery and learning*”, the University Health Network (UHN), Canada’s largest research teaching hospital, brings together over 16,000 employees, more than 1,200 physicians, 8,000+ students, and many volunteers. UHN is a caring, creative place where amazing people are amazing the world.

University Health Network (UHN) is a research hospital affiliated with the University of Toronto and a member of the Toronto Academic Health Science Network. The scope of research and complexity of cases at UHN have made it a national and international source for discovery, education and patient care. Research across UHN's five research institutes spans the full spectrum of diseases and disciplines, including cancer, cardiovascular sciences, transplantation, neural and sensory sciences, musculoskeletal health, rehabilitation sciences, and community and population health. [Find out about our purpose, values and principles here.](#)
